

The easiest thing you'll do all day.

Here are 6 more ways to conserve energy.

1.
Turn off lights and other equipment when not in use.

2.
Keep windows and doors closed.

3.
Adjust blinds to deflect heat in summer and trap heat in winter.

4.
Use task lighting for close work.

5.
Unplug chargers when not charging equipment.

6.
If a computer is idle for more than 30 minutes turn off the monitor.

What's one more?

Make saving energy part of your day.

1.

Turn off lights and other equipment when not in use.

2.

Keep windows and doors closed.

3.

Adjust blinds to deflect heat in summer and trap heat in winter.

4.

Use task lighting for close work.
